(54) Title: ARCHITECTURE AND METHOD FOR INTEGRATING AND PRESENTING MEDICAL INFORMATION

(57) Abstract: The method is for navigating in a computer device containing medical information. A first medical module (12, 14, 16, 18, 20, 22, 24, 26, 28, 30) and a second medical module (12, 14, 16, 18, 20, 22, 24, 26, 28, 30) of a module menu are provided. The first medical module is different from the second medical module. A display (200) displays the module menu (204) and a bookmark activation device (228) for activating a bookmark module (290). The first medical module from the module menu is selected and a first information segment in the first medical module is marked as a first bookmark. The second medical module is selected and a second information segment in the second medical module is marked as a second bookmark. The first and second bookmarks are stored in the bookmark module (290). The bookmark activation device is triggered to activate and display the second bookmark module.
